

iBwave
Unity **TEAM**

THE SIMPLEST WAY TO PLAN , EXECUTE AND TRACK ALL OF YOUR WIRELESS NETWORK DESIGN PROJECTS FROM ONE LOCATION.

With **iBwave Unity Team**, all of your site and project information is automatically synchronized and located in a single location for easy access and analysis. Gone are the days where your information, documentation, and data are all located in several different places making it difficult to accurately track the progress, schedule and costs of your project. You will always have most up-to-date project information and you won't have to spend hours searching for the latest files or chasing incomplete information. iBwave Unity Team gives you quick access to information you need to quickly measure what's working, what isn't working, and mitigate any risk to your profit.

KEY BENEFITS

Synchronize all of your project information

Automate your project workflow to save hours of time

Track project progress and costs so you stay agile

Customized project status reporting

Provide a full disaster recovery plan

Synchronize all of your project information

When you have several people working on a project it is hard to keep all of the information synchronized. People end up with older versions, wrong information, and as a result, the project's schedule and budget are put at risk. With iBwave Unity Team, all of your wireless network project information is automatically synchronized in one location so are always working with the latest information.

- ✓ iBwave Drive (built-in file synchronization utility for Unity and Design files)
- ✓ Automatic synchronization of project data from iBwave Design
- ✓ Version control of iBwave Design files
- ✓ Advanced search engine to quickly search for projects
- ✓ Network validation and error checking

Automate your project workflow to save hours of time

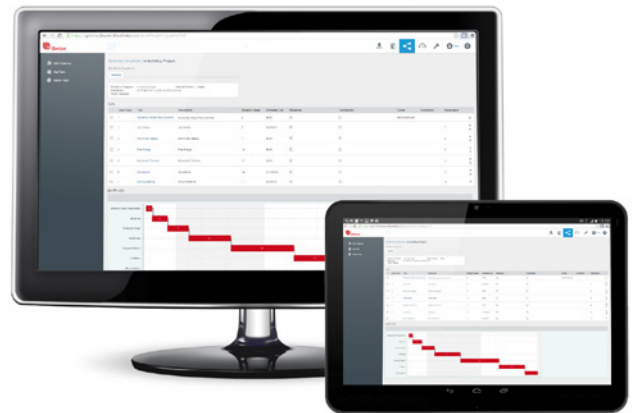

When a project manager has to spend time doing things manually, the risk to a project's schedule, budget and quality are increased. With iBwave Unity Team, key project management tasks are automated so the project manager's time is optimized and they can focus on managing the project's success criteria and risks.

- ✓ Best-practice workflow template for network design projects (customizable)
- ✓ Task checklists
- ✓ Resource assignment and tracking
- ✓ Project cost and schedule tracking
- ✓ Automatic email notifications (based on set criteria)
- ✓ Seamless synching of data and files from iBwave Design

Track project progress and costs to stay agile

With multiple projects on the go, it's hard to get the right information at the right time to make critical go/no-go business decisions that impact your bottom line. With iBwave Unity Team, you get immediate insight into what is working and what isn't working so you remain strategically agile.

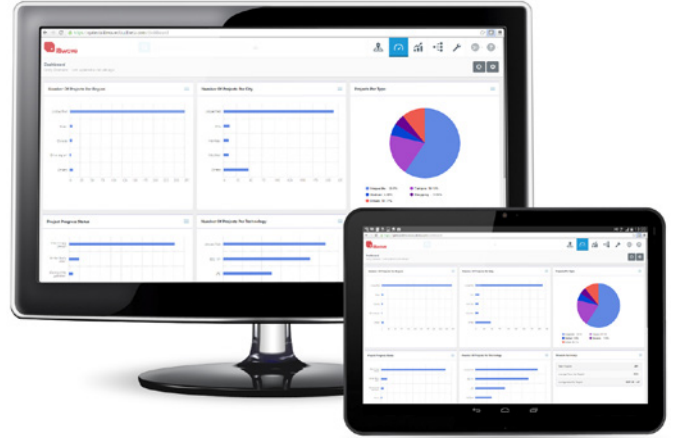

- ✓ Summary and detailed project cost reports (by project or for all)
- ✓ Project tracking reports (by project or for all)
- ✓ Accurate schedule estimation and tracking
- ✓ Project Summary dashboard

Customizable project status reporting

With iBwave Unity Team, you don't have to worry about chasing status updates or manually putting reports together. Project reports are pre-built, customizable, and easy to generate and send whenever you need to.

- ✓ Project Cost Details
- ✓ Equipment List
- ✓ Cable Routing
- ✓ Project Design Summary
- ✓ Project Compliancy

Provide a full disaster recovery plan

With iBwave Unity Team, all of your past and current wireless network project files are centralized and accessible from anywhere. Should an unforeseen event strike, your company will have minimal disruption to business and any financial or customer service risks will be drastically reduced.

- ✓ Central repository to store all of your site and project information
- ✓ Access to information from anywhere, anytime (SaaS based)

iBwave Drive provides complete synchronization with iBwave Design

Quick project setup with built-in workflow template

FEATURE SET

Site and Project Management

- ▶ Centralized project repository
- ▶ Dynamic project organization
- ▶ Version control of Design files
- ▶ Built-in search engine to locate information quickly
- ▶ Customizable layout and templates for sites and projects
- ▶ File attachment organization and categorization
- ▶ Possibility to link information to Google map

Integration with iBwave Design and iBwave Mobile

- ▶ Automatic population of project data from Design files
- ▶ Upload and Download any attachment type
- ▶ Define upload validation criteria for Design files to reduce errors

iBwave Drive (NEW!)

- ▶ Built-in file synchronization and sharing functionality across iBwave Unity and Design
- ▶ Storage and sharing folder structure controlled based on users roles
- ▶ Open files from/Save files to and Edit files from iBwave Unity and Design

Centralized Database of Components

- ▶ Track the database version for each project design
- ▶ Storage and version control of the shared Database of components
- ▶ Define a list of approved and equivalent components and sub-components

Reports

- ▶ Equipment list for each and all projects together report
- ▶ Cost details for each and all projects together report
- ▶ Cable routing for each and all projects together report
- ▶ Project design summary for each and all projects together report
- ▶ Project compliancy for each and all projects together report

Dashboards

- ▶ Task summary dashboard
- ▶ Project summary dashboard

Workflow Management (Optional)

- ▶ Track and assign resources, monitor timelines and costs
- ▶ Gantt chart view
- ▶ File attachments to project workflow tasks
- ▶ Define and manage projects and detailed tasks description with check list items
- ▶ Automatic Email notifications based on project criteria

Mobile Tablet Compatible (NEW!)

- ▶ Possibility to access iBwave Unity from Tablet

Security and Access Privileges Control

- ▶ Define and manage users and roles and access privileges
- ▶ User management (project compliancy, project states, project types, regions, DAS types, feed types, mobile devices)
- ▶ Define and manage site, project and folder access privileges
- ▶ Define and manage Email notification rules based on user profile
- ▶ Access control on workflow templates, tasks and projects
- ▶ System monitoring (project history, user activity and history, queue health, status and history, licensing summary, error reports, remote shared errors)

Deployment options

- ▶ Cloud Deployment
- ▶ 30GB of storage for the 3 users (additional storage can be purchased)
- ▶ 3 users for standard package (additional seats available for purchase)
