

Better Workflows. Better Reporting. Better Wireless Management with Digital Twins

Managing wireless projects without a unified platform can be time-consuming and complicated. **iBwave Unity**, available as a **cloud or self-hosted solution**, enhances your wireless designs, surveys, and management by simplifying project configuration, streamlining workflows, and enhancing reporting.

And with centralized, digitized documentation for storage and versioning, and the power of digital twins, you and your teams can ensure to always work with the latest files.

Save time, improve collaboration, and gain valuable insights through intelligent data.
Work smarter with iBwave Unity.

KEY BENEFITS

SAVE TIME & COST

Save up to **6 hours** per project with predefined configurations & smart reports.

ENHANCE SURVEYS & DESIGNS

Streamline workflows with customizable checklists & templates.

CENTRALIZE MANAGEMENT

Store, access and share project data efficiently in a digital twin.

STANDARDIZE & VISUALIZE

Standardize survey & design processes with clear, visual insights.

STREAMLINE COLLABORATION

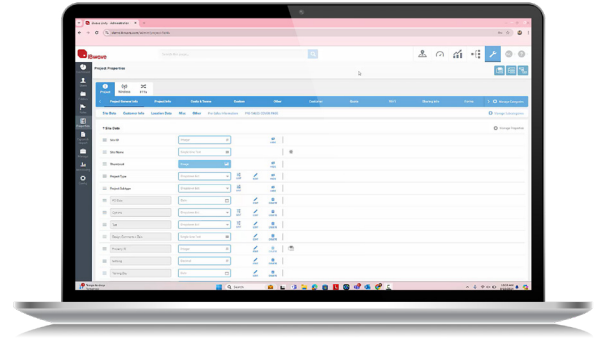

Seamlessly collaborate with stakeholders through digitalized documentation.

Streamline Project Setup and Standardize Workflows

Minimize manual configurations while improving survey and design processes with automation and customization – cutting project time up to **25%** and boosting ROI.

- ✔ Design and Survey Templates
- ✔ Network Survey Checklists
- ✔ Built-in Workflow Automation

Leverage Advanced Reporting for Smarter Decisions

Forget about managing multiple platforms with static data. Keep teams and stakeholders informed with customizable, automated project reports with intelligent data, and leverage business intelligence for actionable insights – always easy to create and share.

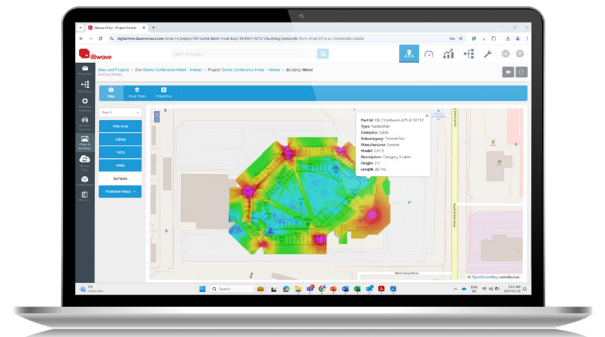

- ✔ Real-Time Status Reports
- ✔ Automatically Updated Reports in iBwave Design and Unity
- ✔ No Need for External Storage Platforms.

Centralize Management with Digital Twins

Access all your projects within a digital twin of your building. With powerful visualization functionality, view the building model, track deployed technologies, and monitor changes in one place for simplified management and collaboration.

- ✔ Smart Repository for Design and Survey Files
- ✔ Intelligent Data Visualization
- ✔ Version Control and Secure Sharing

With iBwave Unity, you're not just managing wireless projects—you're transforming how they're delivered. By combining **streamlined workflows**, **smart reporting**, and **digital twins**, iBwave Unity ensures your team works faster, smarter, and more effectively.

Which Version is Right for You?

	UNITY CLOUD	UNITY ENTERPRISE
HOSTING	iBwave Cloud Hosting	Self-hosted
TEAM SIZE	Ideal for Individuals & Small Teams	Built for Large, Collaborative Teams
COST	Low-Cost	Enterprise-Grade Solution
FEATURES	All	All

FEATURES ADDING VALUE TO EVERY USER

iBwave Mobile

iBwave Design

SPECIFIC FEATURES

iBwave Mobile

- Configure survey checklists for complete on-site data capture
- Prepopulate sites in Unity to streamline technician workflows & assignments

iBwave Design

- Create customizable templates
- Leverage advanced reporting
- Automate deliverables with intelligent data
- Save 4-6 hours per project on average

UNITY UNIVERSAL FEATURES

- Standardize designs for accuracy, coverage, and interference control
- Digitize records and streamline collaboration with all stakeholders
- Ensure system interoperability through comprehensive APIs
- Reuse designs for upselling, maintenance, and automation
- Access a global building library for simplified stakeholder access
- Leverage business intelligence for smarter decisions
